Executive Summary

Results-oriented data scientist and analyst with a proven track record of leading research and development projects from conception to completion. Adept at designing and implementing experiments, analyzing complex data sets, and translating findings into actionable recommendations. Interested in a challenging data engineering and analytics role where I can leverage my experimental design and data analysis expertise to translate complex data into real action.

Experience

5/2023 – current **Co-founder** *Reverb Robotics Inc*

Lead for technology development, data engineering / science, primary programmer

- Building microcontroller-based anomaly detectors for unmonitored assets.
- Developing a proprietary auto-configuring model agnostic to sensor type.
- Clients in healthcare, manufacturing, heavy industry, and research.
- Currently an Innovation Catalyst Grant Fellow (Alberta Innovates) at the University of Lethbridge (remote).

5/2023 – 5/2025 **Postdoctoral Associate** *University of Lethbridge*

Independent researcher in the Brain in Action Laboratory (led by Dr. Claudia Gonzalez).

- Investigated the use of AI-driven technology to assess cognition in senior citizens.
- Designed, collected data, built models, and presented data at several local and national conferences.
- Funded via Mitacs Accelerate Postdoctoral Fellowship.

2/2020 – 12/2022 **Quality Assurance Researcher (Intern)** *BioWare*

Project lead for eye- and mouse-tracking implementation on unreleased titles.

- Designed experiments and generated statistical models of player behavior to directly inform user experience design.
- Developed custom data collection, databasing, analysis, and assessment pipelines.
- Presented findings to stakeholders in industry and international academic conferences.
- Data stewardship governance compliance (GDPR).

Education

Ph.D. in Psychology
University of Alberta
2017 – 2023

M.Sc. in Neuroscience
University of Lethbridge
2015 – 2017

B.Sc. in Neuroscience
University of Lethbridge
2011 – 2015

Technical Skills

Programming
`Python`, `SQL`, `MATLAB`, `C++`

Experimental Design
Designing rigorous empirical frameworks to extract clean, actionable datasets.
CI/CD · automated testing · reproducibility

Methods

- Databasing (Snowflake, SQL, PostgreSQL)
- Modeling (`sklearn`, `jax`, `torch`)
- Statistics
- Machine learning
- Data science pipelines

Communication
Translating complex data sets into high-impact presentations for technical stakeholders, industry leaders, and academic audiences.
